of an organism is the cell, histology is probably the most important single study in pathology. It seems that, hitherto, no information on histology of fish had been published and this is an attempt to fill the gap. The authors have produced an excellent book. A well-written text is accompanied by some 240 good photomicrographs, some of which are in...

In our lab we use the zebrafish for cancer research, and it is the basis for this histological atlas. The atlas spans the life of the zebrafish from embryo to adult and contains sections of tissue from three anatomical planes (sagittal, coronal, and transverse). Adult, wild-type zebrafish (*Danio rerio*)
