### Brain Mind Consciousness Skeptic

Research on the brain, mind, and consciousness was given a significant boost by Nobel laureate Dr. Francis Crick in 1994, when he wrote in his book, *The Astonishing Hypothesis: The Scientific Search for the Soul*, "that 'you,' your joys and your sorrows, your memories and your ambitions, your sense of personal identity and free will, are in fact no more than the behavior of a vast assembly of nerve cells and their associated molecules."
