Chemical engineering is no exception. In this important area, more specifically its most expansive component, chemical reaction engineering (CRE), what is missing is a "textbook" for graduate-level teaching to twenty-first-century graduate students. The question arises: Should there be a text at all for any graduate course?

Chemical Reaction Engineering by K. A. Gavhane. Book Summary: It gives me a great pleasure to present the third edition of the book - CHEMICAL REACTION ENGINEERING to students of fifth semester of diploma course in Chemical Engineering as per 'G' scheme. The matter is written in a simple and lucid language and thoroughly checked for corrections. A substantial number of solved examples are included which would help students gain a better insight into the theory.
