And the fragmentation of China's intelligence agencies would have to be overcome. But the government is creating the capacity for a long-tentacled regime of social control. Many of the elements are ready: the databases; the digital surveillance; the system of reward and punishment; and the we-know-best paternalism. What remains is to join the pieces together. If and when that is done, China would have the world's first digital totalitarian state. As another character in "Super Sad True ...
