Ford Fiesta Abs wheel speed sensor. Rear, disc, brakes ...

P0500 is a OBDII trouble code that affects the Ford Fiesta's Vehicle Speed Sensor (VSS). The VSS sends a signal to the engine's computer letting it know how fast that the vehicle is going. The Fiesta uses this signal for many vehicle functions. It helps control transmission shifts, ABS, cruise control, the speedometer, and more.

Sensor, speed for Ford FIESTA (JHS) 10.2005-09.2008 ...

The vehicle speed sensor (VSS) on your Ford vehicle is an electronic device that measures your vehicle's speed. This information is sent to the electronic computer module (ECM), where it is shared with other vehicle systems that depend on this data. The function of several of your vehicle's systems depend on data from the VSS and ECM, such as variable speed power steering, cruise control, anti-lock brakes and your speedometer.

speed sensor | NAPA Auto Parts | - Buy Car & Truck Parts ...

The tools needed for testing either a 2 or 3 wire speed sensor are essentially a multimeter with the clamp leads, and a drill. The 3 wire speed sensor is externally powered, so you will need a power source of some form. First off is testing the 2 wire speed sensor. These sensors are self powered, meaning the revolutions inside the case generate the signal needed to create movement in the speedometer.

Testing 2 and 3 Wire Speed Sensors - Speedway Motors

ABS Brake Wheel Speed Sensor Testing. All anti-lock equipped vehicles are designed with a wheel speed sensors (WSS), one at each wheel. A stator ring is then used with the sensor which attaches to the brake rotor, CV joint, rear axle or bearing hub. This stator ring has many metal "teeth" which create a magnetic field that is built up and then ...
