About the Repository - Munich Personal RePEc Archive

An important reason is the integrity of the archive and the RePEc services (NEP, CitEc). If a paper is taken from the archive, all links and references will become dead. This means that citations cease to be reliable. Another reason is related to documentation of priority of results. A crazy case would be that a paper is plagiarized and then ...

This study empirically examines the demographic determinants of car ownership in Japan between 1980 and 2009. Unique car cohort data, composed of the car age and 11 car types, at the prefectural level, is analyzed. The primary reason for examining the demographic determinants of car ownership in Japan is because Japan is projected to face radical demographic changes in the next few decades.

Demographic determinants of car ownership in Japan ...

The construction of knowledge maps, demonstrated in this paper, is designed to show the epistemic landscape of cities, countries or regions. Knowledge assets, knowledge producing and disseminating organisations are referenced to spatial objects and integrated into GIS. They are further represented in thematic maps and in 3-D perspective graphs.
